

Program changes effective Summer 2012.

School Nurse Education

School nurses practice in the school environment where they are often isolated from other health care practitioners and are challenged to meet the needs of an exceedingly diverse population. This program uses the best of face-to-face and online education to provide a context for school nurses to network together to study and explore current professional issues. Students also focus on evidence-based practice, school nursing research, professional and political advocacy and effective school community service.

Master of Education — Professional Advancement

32 credits • 4 terms • In Massachusetts, this degree may lead to school nurse *professional licensure*. In other states, this program does not satisfy licensure requirements. You must check with your state licensing/credentialing authorities.
