

Prof. Thomas Campbell, M.Ed.

School Affiliation:	School of Education, School of Management, and Undergraduate Programs
Rank:	Part-time Faculty Member
Date of Hire:	June 1998
Education:	M.Ed., Integrated Studies, Cambridge College

Biographical Sketch:

Professor Campbell has served on the part-time faculty since 1998. He served on the Cambridge College Senate and was the co-chair in 2000 - 2001. In addition, he has served on several academic technology task forces and has led workshops for students and faculty in the utilization of technology in learning. Campbell is proud to be a graduate of Cambridge College and he set a goal to teach at the school while still in the graduate program.

Thomas Campbell has extensive experience in organizational learning and development, project and change management. He works with clients interested in inculcating creativity and innovation in their workforce. Campbell enables peak performance, cooperation and collaboration among members of groups by increasing the members' capacity to understand each other. He is a certified HBDI (Herrmann Brain Dominance Instrument) practitioner.

As with his corporate solutions, his graduate classes include classroom-based, blended and distance learning models. Prior to launching Thomas Campbell & Co. Inc. in 1998, Campbell gained two decades of management and individual contributor experience working in the financial services, high tech, manufacturing and retail industries.

Born, raised and schooled in Manhattan and The Bronx, Campbell now resides in the Monadnock region of New Hampshire with his wife and son. He is an accomplished musician (he appeared professionally throughout the Northeast) and an enthusiastic gardener. While he enjoys the bucolic idylls of rural life, family vacations often focus on visits to urban landscapes to enjoy the amenities of cities: museums, theater, music and food.
